Boundary Fencing

Durable Security Solution

Safe Direction Boundary Fencing is used to prevent unauthorised vehicle access into open spaces, such as parks, sporting fields, native areas and other recreation areas.

Featuring galvanised steel posts that are driven directly into the ground and galvanised steel cables, Boundary Fencing provides an easy-to-assemble and durable security solution.

Specifications

- Galvanised steel C-posts that are driven directly into the ground.
- Recommended post spacing: 3m.
- 19mm diameter, galvanised cable.

Features

- Can be configured with twin or triple cable arrangement.
- Threading of cables through the posts restricts removal by vandals.
- Galvanised components providing a durable solution.
