

Guardrail Accessories

Attachments for W-Beam Guardrail

Accessories are designed for attachment to the various [RHINO-STOP® w-beam guardrail systems](#). At the end of the system they shield sharp edges and provide a quality finish. Throughout the system they are used to form joins or corners to suit site variations.

Safe Direction w-beam guardrail accessories are hot dip galvanised with the option of powder-coating providing a highly visible, durable solution.

Fishtail Terminal (with optional yellow powder-coating)

Yellow End Cap

Short Bullnose Terminal

Flexible Connector (with optional yellow powder-coating)
