

BIKER-SHIELD™

Motorcycle Protection

Specifications

- Complies with the recommendation for testing of Motorcyclist Protection Devices as documented in AS/NZS 3845.1:2015 Road safety barrier systems and devices
- Crash tested in accordance with MASH Test Level 3 (3-10)
- Crash tested in accordance with European Technical Specification EN1317-8
- Crash tested to simulate sliding rider impacting at 60km/h

Features

- BIKER-SHIELD™ is positioned below RAMSHIELD® Guardrail and prevents a dismounted motorcyclist from contacting the supporting posts of the guardrail barrier.
- The flexible mounting bracket connects directly to the w-beam guardrail panel and absorbs rider impact energy providing a forgiving impact.
- The face of BIKER-SHIELD™ aligns with the face of w-beam guardrail reducing the potential for rider pocketing and/or snagging.
